GUESS WHO?

PRESIDENT'S FOREWORD

Sincere Welcome to the 35th Winter Clinic

This year's Winter Clinic Chairman, Dr. Bernard Crystal, along with his Committee has prepared an excellent and varied program for the dentists, hygienists and nurses.

I would urge you all—because of the large attendance last year—to pre-register early! This year there will again be a draw and prizes for Pre-Registrants.

I express sincere thanks to all the Exhibitors who play a large part in making this convention possible.

Come and bring your staff. You will appreciate and enjoy the knowledge and friendship that every year's Winter Clinic has provided to all Academy members.

Don M. McKee, D.D.S.
President

TORONTO DENTAL NURSES AND ASSISTANTS ASSOCIATION

THE ONTARIO DENTAL HYGIENISTS' ASSOCIATION

All Day Programme

Registration Fee: \$10.00

Room: Library

Luncheon included

"DENTAL HYGIENE, ITS PRESENT AND FUTURE"

Come and learn about the recent developments in the areas directly affecting the dental hygienist today, such as, practice, employment and legislation.

This is the first all day programme held at Winter Clinic specifically for dental hygienists. We hope you will support it!

Detailed programme and pre-registration form to follow under separate cover.

This programme is presented for the benefit of ALL our members. Attend, learn and enjoy yourself!

**HONORARY
LIFE MEMBERSHIP****George Carrick Hare,
D.D.S., F.R.C.D.(C),
F.A.C.D.**

On the occasion of the 1972 Winter Clinic, the Academy is honoring one of its most illustrious members with an Honorary Life Membership.

George Hare was born in London, Ontario, but at two years of age persuaded his parents to move to Toronto. He attended Western Avenue Public School and Humberside Collegiate Institute in the west end of Toronto. In 1923 he began the study of Dentistry and graduated from the Faculty of Dentistry, University of Toronto in 1928 with a D.D.S. degree. He immediately entered the general practice of Dentistry in Toronto and retained that practice until 1964. Early in the forties, he came under the teaching and influence of Dr. Ralph Sommer of Michigan and Dr. Louis Grossman of Philadelphia. As a result of this association, he developed a devotion to endodontics which continues to this day. He became a charter member of the American Association of Endodontists in 1943 and was President of that organization in 1957. At the time of the formation of that body, root canal therapy was barely tolerated if not actually condemned by the great proportion of dentists and physicians. George Hare was one of a group of missionary workers who fought the extraction epidemic and the high regard in which endodontics is held today is a tribute to the efforts of such men. In 1948 he formed the Toronto Endodontic Club and it is still an active organization. He particularly treasures an Honorary Membership in the Club. In 1945 he accepted the invitation of Dean Arnold Mason to establish and guide an undergraduate course in Endodontics at the University of Toronto. This position he held, with the rank of Associate Professor until his retirement from the University in 1970. In 1958 he was granted a Fellowship in the American College of Dentists and in 1964 became a Diplomate of the American Board of Endodontics. In the same year, he became the first President of the Canadian Academy of Endodontics and in 1967 received a Fellowship in the Royal College of Dentists of Canada. George and Anne were married in 1929 and with their three children and seven grandchildren form a very happy family. He limited his practice to Endodontics in 1946 and still maintains an office although he is looking forward to complete retirement from dentistry—in about twenty years or when Argos win the Grey Cup!

There will also be a presentation of "50 Year" Certificates.

FELLOWSHIP HOUR**5.00 - 6.00 p.m. — Canadian Room**

ACADEMY FUNCTIONS YOU SHOULD PLAN TO ATTEND

FIRST STATED MEETING:

Wednesday, January 24, 1973

9.00 a.m. - 5.00 p.m. — Inn-on-the-Park

Luncheon included

Robert B. Shira, D.D.S., F.A.C.D.

Dean, School of Dental Medicine, Tufts University

Professor of Oral Surgery, Tufts University

“Selection of Patient for Anesthesia and
Surgical Procedures”

“Common Problems in Exodontia and Oral Surgery”

“Diagnosis and Treatment of Infections of
the Oral Cavity”

CURLING BONSPIEL: Wednesday, March 7, 1973

Thornhill Country Club — All Day Bonspiel

Entry by rinks

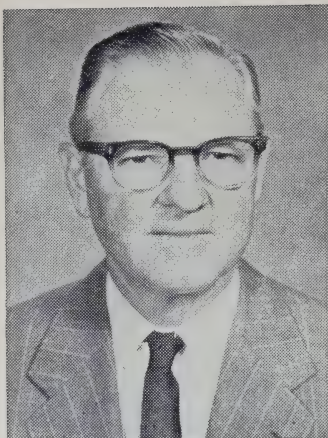

SECOND STATED MEETING:

Wednesday, March 14, 1973

Base Borden — Academy Day

Canadian Forces Dental Service School

This will be our fifth visit to the Base which is an indication of the popularity of the trip. Don't miss it! Registration fee includes chartered bus transportation, luncheon and dinner. The hospitality of the Officers Mess is famous.

Recent Advances in Crown and Bridge Prosthodontics with Special Emphasis on Utilization of Dental Porcelain in Restorative Dentistry.

**JOHN C. BARTELS,
D.M.D.
Portland, Oregon**

Synopsis:

An illustrated discussion to project the philosophy and technique of employing porcelain in the broad field of restorative dentistry. It will cover the current Vitadur porcelain bonded to gold and aluminous oxide porcelains for full veneer porcelain crowns. It will discuss educating the patient to the necessity of considering the masticating organ as a complete entity when receiving restorative therapy.

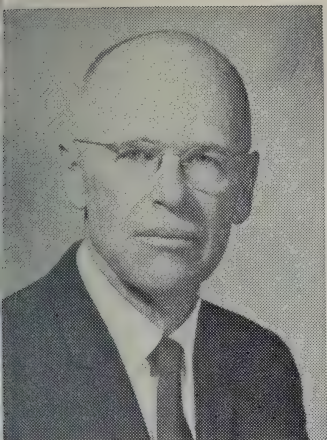

Biography:

Dr. John C. Bartels is a graduate of North Pacific College of Dentistry in Oregon. He was an undergraduate instructor on the subject of Dental Ceramics at the University of Oregon for fourteen years. For many years he has presented post-graduate courses on the subject of Ceramics, Crown and Bridge, and Full Mouth Reconstruction at the University of Oregon Dental School. He conducts a private practice in Portland with emphasis on Full Mouth Reconstruction. He is a member and past president of The American Academy of Restorative Dentistry, a member of the American Academy of Gold Foil Operators, a Fellow of the American College of Dentists, and a member of Omicron Kappa Upsilon. He has written many articles on restorative dentistry for various journals and presented numerous essays and post-graduate courses throughout the United States, Canada, Europe, Australia, and New Zealand.

Place: Territories Room

Time: 9:30 — Chairman — Dr. F. Pearson

2:30 — Chairman — Dr. E. S. Walker

**Amalgams, Cements
and Esthetic Restoratives:
Some New Developments**

**NELSON W. RUPP,
B.A., D.D.S., M.S.
Washington, D.C.**

Synopsis:

Recently introduced direct restorative materials will be discussed along with conservative cavity preparation and recommended techniques for handling each material. Slides of clinical cases, scanning electron microscope pictures and laboratory data will be presented in a session that will be open for questions and discussions at all times.

Among the materials to be discussed will be spherical and dispersion phase alloys for dental amalgam, polycarboxylate cements, composite resins and fissure sealants. The causes of failures and methods for reducing their frequency will be included.

Biography:

Dr. Nelson W. Rupp received a B.A. degree from Denison University in 1939, a D.D.S. degree from Ohio State University in 1943, and in 1955 an M.S. degree in dental materials from the National Bureau of Standards and Georgetown University. He has two years of private practice in Dayton, Ohio and recently retired from the Naval Dental Corps. His experience has been divided between general dentistry, dental materials research and education. Currently Dr. Rupp is a Research Associate for the American Dental Association at the National Bureau of Standards. Recent publications have been concerned with mercury hygiene in the dental office, denture base materials, dental amalgam and dental cements.

Memberships in professional organizations include: American Academy of Gold Foil Operators; American Academy of Operative Dentistry; and the International Association for Dental Research.

Place: Confederation Room

Time: 9:30 — Chairman — Dr. D. Cowan

2:30 — Chairman — Dr. P. A. Watson

THINGS TO REMEMBER

Fissure Sealants: An Adjunct to Caries Prevention Programs

A. J. GWINNETT, B.D.S., Ph.D.

London, Ontario

Synopsis:

The concept and rationale associated with pit and fissure sealing in both deciduous and permanent teeth will be presented. The morphology of pits and fissures and their contents with reference to penetration and bonding of adhesive sealants, and the problems associated with the use of adhesives in the oral cavity will also be discussed.

The clinical protocol of pit and fissure sealing will be presented together with data from on-going clinical preventive programs. The sequencing of sealant application with other preventive measures will also be discussed.

Biography:

Dr. Gwinnett graduated from the University of Birmingham in 1959 and earned a Ph.D. in 1964 from the University of Bristol. He has spent some time in general practice; was a Fulbright Fellow 1964-1968; Research Fellow at Eastman Dental Centre 1964-1965; Assistant Professor of Dentistry, Dalhousie University 1967-1969; and presently is Associate Professor of Anatomy and Restorative Dentistry, University of Western, Ontario.

Place: Manitoba Room

Time: 10:45 — Chairman — Dr. M. Hardy

3:45 — Chairman — Dr. G. Joyner

The Advantages of Functional bite techniques in obtaining greater accuracy and reducing chair-time

FRANCIS L. ZARB, B.D.S., D.D.S.

Toronto

Synopsis:

The use of sophisticated articulators and recording systems is not necessary when one or two quadrants of the mouth are to be restored. The abuse of a wax wafer bite plus a simple hinge articulator has reached epidemic proportions. Unnecessary time is lost and much guess-work ensues in grinding prematurities in our restorations. Exact occlusal contacts can be readily and simply obtained by the use of the anatomic and functional cores.

Biography:

Dr. F. Zarb obtained his B.D.S. from the Royal University of Malta in 1963. He graduated from the University of Toronto in 1966. In 1968 he went to New York University to do a graduate course in Prosthodontics and received his diploma in 1970. He is currently working on his Master's thesis in Prosthodontics. He is a Clinical Demonstrator and Lecturer at the University of Toronto in the Prosthodontic Department.

Place: Tudor Room

Time: 10:45 — Chairman — Dr. R. Sexton

3:45 — Chairman — Dr. G. Sultmanis

The Asymptomatic Impacted Third Molar
PAUL CHAPNICK, D.D.S., F.R.C.D.(C)
Toronto

Synopsis:

The prophylactic removal of all unerupted and impacted third molars at an early age is strongly advocated. From a study of growth and development, we know that early advice can be given to patients regarding the prognosis of their impacted teeth and we can thus prevent many of the pathological sequelae inherent to the prolonged retention of malposed teeth. There are a few circumstances that call for their preservation and these will be presented.

Biography:

Dr. Chapnick graduated D.D.S., University of Toronto in 1962. His post-graduate Oral Surgery training was at Boston University, a New York City Hospital as an intern and Doctors Hospital, Toronto as Senior Resident. He is Chief of the Dental Department of Northwestern General Hospital, and an attending Oral Surgeon at New Mount Sinai Hospital and Peel Memorial Hospital. As well as becoming an F.R.C.D.(C) he is a Diplomate of the American Board of Oral Surgery. He is a member of the Teaching Staff at the University of Toronto and is in private practice.

Place: Alberta Room

Time: 9:30 — Chairman — Dr. P. Lukako

3:45 — Chairman — Dr. J. Hinch

Bandless Orthodontics

RANDY LANG, D.D.S., D. Ortho.

Mississauga, Ontario

Synopsis:

If Orthodontics is to be successfully incorporated into a well-run General Practice, two things are vitally necessary: the development of Diagnostic Skills to differentiate between simple and complicated orthodontic problems; and the mastering of Treatment Skills to choose and effectively use the correct orthodontic appliances.

This illustrated presentation will show the recent development of a totally new concept in orthodontic treatment that will enable General Practitioners to treat many orthodontic problems previously considered treatable only by an orthodontic specialist.

Biography:

Dr. Lang was an honours graduate from the Faculty of Dentistry, University of Toronto in 1966. After a year of general practice in West Toronto, he returned to the U. of T. for his graduate studies in Orthodontics. Dr. Lang is currently a member of the Orthodontic Teaching Staff at the Faculty of Dentistry and is the Orthodontic Consultant on the Editorial Board for the journal "Oral Health". He has presented clinics in both the United States and Canada.

Place: Quebec Room

Time: 10:45 — Chairman — Dr. A. Joe

2:30 — Chairman — Dr. M. Sera

Nitrous Oxide-Oxygen Sedation:

Where it's Been,

Where it's At,

Where it's Going.

W. R. DOVER, D.D.S., B.Sc.D.

Toronto

Synopsis:

Nitrous oxide-oxygen used as sedation (analgesia) has experienced a marked upsurge in interest in recent years. The speaker will attempt to trace the historical development of this technique, the changing concepts which have developed in recent years in terms of apparatus and approach and a look at the future place of nitrous oxide-oxygen sedation in dental practice.

Biography:

Dr. Dover graduated from Faculty of Dentistry, University of Toronto in 1953 and earned his B.Sc.D. in 1962 in "Anaesthesia as it applies to Dentistry". He holds membership in numerous societies of Anaesthesia in North America and Britain. He possesses a certificate from the McKesson School of Anaesthesia (Toledo, Ohio). Dr. Dover is a Past President of Toronto Alumni Chapter, Alpha Omega Fraternity. Presently he is an Associate, Department of Anaesthesia, Faculty of Dentistry, University of Toronto and is in General Practice with a special interest in Anaesthesia.

Place: Alberta Room

Time: 10:45 — Chairman — Dr. G. Cipparone

2:30 — Chairman — Dr. P. Jacobson

What the Dentist Should Know About Alcohol and Drugs

J. S. OLIN, B.A., M.D., F.A.C.P., F.R.C.P.(C)

Toronto

Synopsis:

A review will be given of Pharmacology and Clinical side effects. Implications for dentistry will be considered.

Biography:

Dr. Olin graduated in Medicine from University of Manitoba in 1955. He presently is in private practice in Internal Medicine in Toronto. He formerly was the Medical Director, Medical Unit, Addiction Research Foundation. Other affiliations are as follows: An Associate, Department of Medicine, University of Toronto, An Associate Professor, Department of Epidemiology and Biometrics, University of Toronto, Chairman, Programme Section of Internal Medicine of the Ontario Medical Association.

Place: British Columbia Room

Time: 9:30 — Chairman — Dr. F. Servos

2:30 — Chairman — Dr. G. Morandi

**Radiographic Technique and Interpretation
in Paedodontic Practice as a guide to Treatment Planning**

KEITH C. TITLEY, B.D.S.

Toronto

Synopsis:

Accurate radiographs are an essential part of dental practice and accurate treatment planning. Adequate full mouth surveys for the pre-school child, the child in the mixed dentition and the younger teenager with a complete permanent dentition will be discussed with reference to technique and interpretation. Additional views will be discussed where pathology indicates further data is needed to meet diagnostic criteria.

Biography:

Dr. Titley graduated from Guys Hospital Dental School, University of London, England in 1966. He was awarded the Newland Pedley travelling scholarship to pursue graduate studies in Paedodontics at the University of Toronto. Also, awarded a Diploma in Paedodontics from the University of Toronto in 1969 and presently is an Associate in Dentistry at the same University completing an M.Sc.D. programme.

Place: Manitoba Room

Time: 9:30 — Chairman — Dr. E. Sonley

2:30 — Chairman — Dr. M. Boyes

A Surgical Approach to Endodontics

F. BRUCE BURNS, D.D.S.

G. E. SPARROW, D.D.S.

Toronto

Synopsis:

Under the auspices of the Toronto Endodontic Study Club, Drs. G. E. Sparrow and F. Bruce Burns have produced a new teaching film to demonstrate the indications for, and the surgical procedure employed for pathologically involved teeth requiring surgical intervention. The Producer-Director (Dr. Sparrow) and the Clinician (Dr. Burns) as well as showing this new film, will elaborate on this surgical phase of Endodontics. Some of the features to be seen are the shaping and obliteration of canals by means of a mechanical handpiece.

Biography:

Dr. Burns graduated from U. of T. in 1954 and has practiced in Toronto since then. He is an Associate in Dentistry teaching Endodontics at the Faculty of Dentistry.

Dr. Sparrow graduated from U. of T. in 1954 also and is in general practice in Toronto. Amongst many fascinating hobbies, his interest in Photography has resulted in the producing of outstanding films related to Dentistry.

Place: British Columbia Room

Time: 10:45 — Chairman — Dr. T. McDonough

3:45 — Chairman — Dr. J. Storms

Inflammations and Infections of the Oral Mucosa

J. H. P. MAIN, B.D.S., Ph.D.,

F.D.S.R.C.S.E., M.R.C. Path.

Toronto

Synopsis:

The clinical features, diagnostic criteria and treatment of a number of infections of the oral mucosa will be discussed and illustrated, including Vincent's, apthae, primary herpes, candidiasis, lichen planus and others.

Biography:

Dr. Main was born and educated in Scotland graduating in Dentistry in 1955 from University of Edinburgh. Graduate studies were undertaken in Oral Pathology at Northwestern University. He was associated with the University of Edinburgh as Senior Lecturer and consultant 1960-69. Presently he is professor of Oral Pathology at U. of T. and Head of the Department of Dentistry, Sunnybrook Hospital.

Place: Algonquin Room

Time: 9:30 — Chairman — Dr. J. Bigelow

2:30 — Chairman — Dr. W. Kerr

Radiology in the Practice of Oral Surgery

V. N. DIRENFELD, D.D.S., M.S., F.R.C.D.(C)

Toronto

Synopsis

Radiology is an important aid in the diagnosis and treatment of many conditions that present to the dentist. The presentation will consist of case reviews where radiographic investigation played a major role in their management.

Biography:

Dr. Direnfeld graduated in Dentistry from U. of T. in 1963. He completed graduate training at University of Illinois in 1967. He now practices Oral Surgery in Toronto and is associated with the Toronto East General Hospital and Mississauga Hospital. He is a diplomate of the American Board of Oral Surgeons and teaches part-time at U. of T.

Place: Room No. 3

Time: 10:45 — Chairman — Dr. J. Becker

2:30 — Chairman — Dr. J. Becker

Oral Implantology

T. HORI, D.D.S.

Toronto

Synopsis:

In this presentation the clinician will emphasis the areas suitable for the general practitioner. The programme will include a resume on the current techniques and philosophies in the basic and more advanced phases of implantology.

Biography:

Dr. Hori graduated from U. of T. in 1955 and since then has been in general practice in Toronto. He is past-president Central Dental Society and charter member of A.P.I.S. He has participated in several implant courses in the U.S.A.

Place: Quebec Room

Time: 9:30 — Chairman — Dr. Z. Gordon

2:30 — Chairman — Dr. H. Vogel
